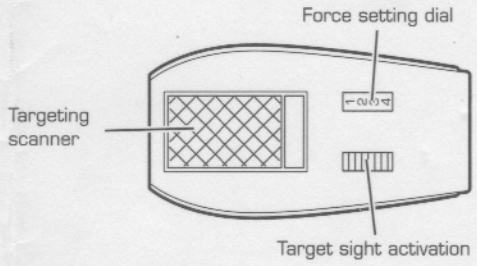
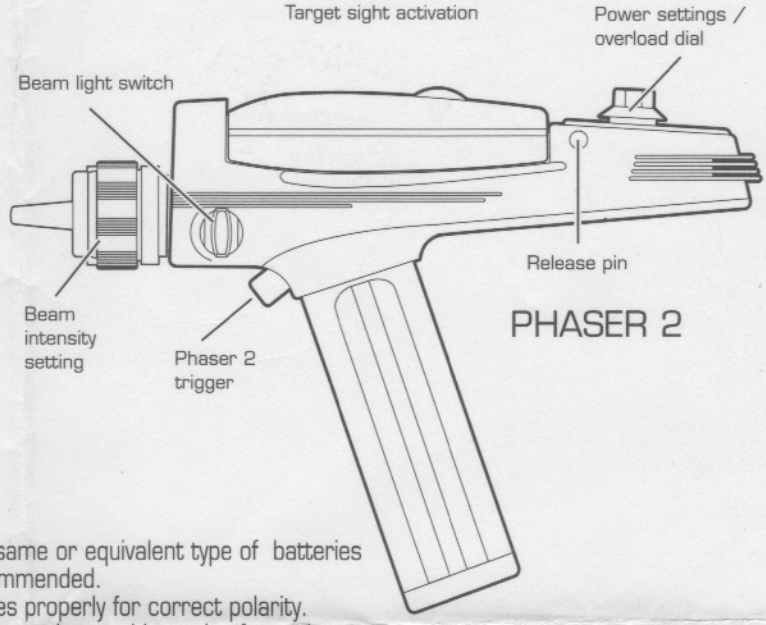
PHASER PISTOL

OPERATIONAL INSTRUCTIONS

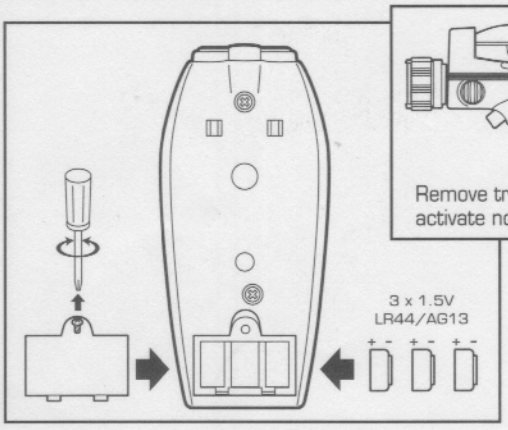
The federation Starfleet phaser pistol features a unique two in one design. Type 1 mini phaser detaches from the type 2 phaser pistol housing to become a separate functional unit.





BATTERY PLACEMENT

Batteries must be replaced by an adult. Replace batteries when sounds become weak or distort or when the light is dim. Use screwdriver (not included) to open battery compartment and insert 3 new batteries as shown.



BATTERY SAFETY INFORMATION:

1. Batteries should be replaced by an adult.
2. Do not use rechargeable batteries.
3. Do not recharge non-rechargeable batteries.
4. Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.
5. Do not mix old and new batteries.
6. Use only the same or equivalent type of batteries that are recommended.
7. Insert batteries properly for correct polarity.
8. Remove dead or exhausted batteries from playset.
9. Do not short-circuit supply terminals.
10. Do not dispose of batteries in a fire; they may explode.
11. Dispose of batteries safely.

1. To remove phaser 1 pull release pin on phaser 2, then lift up phaser 1 as shown.
2. To activate Type 1 phaser press trigger on bottom of Type 1 phaser.
3. The Type 1 phaser has various preset force settings, rotate force setting dial (a) forward to switch from off, stun, kill, torch to disrupt firing modes.
4. Rotate dial (b) forward to lift up simulated targeting scanner.
5. Please note: Type 2 phaser is not a standalone unit. To activate phaser 2 re-attach phaser 1 and press phaser 2 trigger.
6. To enable overload mode, rotate power setting dial clockwise, then press phaser 2 trigger to activate overload light and sound FX.
7. Rotate dial on front nozzle of phaser 2 to adjust beam light intensity. To disable light effects, turn switch on side of phaser 2.

The electrostatic discharge may interfere with the module, if it occurs, please re-install the batteries.

WARNING: CHOKING HAZARD – Small parts. Not for children under 3 years.
